# Tristan Putman

Director of Software Development | Web Developer

*"I am an experienced I/T professional seeking a position that will leverage my technical, business, and leadership skills."*

## Corporate Experience

### Director—Software Development

2005-Present

#### Goodyear Commercial Tire & Service Centers

*Tristan's strengths are his technical know-how, organization, and communication. He does a very good job managing the largest and most diverse (skill-set wise) group of systems analysts supporting the entire gamut of business software.*

Brad Holmes  
Senior Director  
Management Information Systems  
Goodyear Commercial Tire & Service Centers

Managed the overall progress of a large team of developers while also developing in-house applications toward increasing productivity and efficiency improvements for both my staff, business users, and field associates

Responsible for implementing projects and solutions that directly contributed increases to the bottom-line of the company

Created fully dynamic and robust systems used throughout all levels of the organization to manage and track every aspect of company performance and metrics

Served on cost-cutting, OGSM, AOP, and Strategic-Planning committees

Created development action plan processes to measure and evaluate employee performance for basing staffing decisions

### Supervisor—Application Development

1998-2005

#### USA Truck, Inc.

Supervised the day-to-day progress of a small team of developers, as well as primary coding responsibilities for specific departments within the company

Lead Web Developer responsible for all aspects of platform choice, code design, implementation, and maintenance

Managed all special projects that were outside the scope of our traditional development, such as new technology research and 3rd party product integration
